CONTENTS

Volume 14

Number 1, March, 1968

A. YAMANOI and T. SHIRO: Studies on inosine fermentation—Production of inosine by mutants of *Bacillus subtilis*. VI. Selection of amino acids essential for the adenine-sparing action 1

K. KOMAGATA, Y. TAMAGAWA and H. IIZUKA: Characteristics of *Erwinia herbicola*... 19

K. KOMAGATA, Y. TAMAGAWA and M. KOCUR: Differentiation of *Erwinia amylovora*, *Erwinia carotovora*, and *Erwinia herbicola* 39

S. FUKUI and A. HIRATA: Effect of manganese ion on growth energetics in *Agrobacterium tumefaciens* 47

N. MURATA and W. SZYBALSKI: Identification of the complementary DNA strands of the coliphage deletion mutant λdg_{A-J} by DNA-DNA hybridization 57

L.A. VEIGA: Polyol dehydrogenases in *Candida albicans*. I. Reduction of D-xylose to xylitol 65

L.A. VEIGA: Polyol dehydrogenases in *Candida albicans*. II. Xylitol oxydation to D-xylulose 79

N. AHMAD and K.K. JHA: Solubilization of rock phosphate by micro-organisms isolated from Bihar soils 89

H. MURAKAMI, S. TAKASE and K. KUWABARA: Non-productivity of aflatoxin by Japanese industrial strains of *Aspergillus*. II. Production of fluorescent substances in rice koji, and their identification by absorption spectrum 97

Number 2, June, 1968

S.-T. CHUNG, S. ITO, K. AIDA and T. UEMURA: Studies on ATP deaminase. V. A relationship between deamination and dechlorination activities of ATP deaminase, ADP-deaminating enzyme and AMP deaminase 111

S. NAGAI, Y. NISHIZAWA, I. ENDO and S. AIBA: Response of a chemostatic culture of *Azotobacter vinelandii* to a delta type of pulse in glucose. 121

S. OTSUKA and I. SHIIO: Fatty acid composition of cell wall-cell membrane fraction from *Brevibacterium flavum* 135

S. NAGASAKI: Physiological aspects of various enzyme activities in relation to the culture age of *Aspergillus niger* mycelia 147

G. TOMONAGA: Effect of nystatin on the formation of extracellular protease by *Aspergillus niger* 163

A. NISHI, T. YANAGITA and Y. MARUYAMA: Cellular events occurring in growing hyphae of *Aspergillus oryzae* as studied by autoradiography 171

Y. TAKAHASHI and S. HINO: Biochemical changes during the development of respiratory activity in *Escherichia coli*. I. Changes in permeability and some other factors 183

K. BISWAS and S. MUKERJEE: Studies on the action of some antibiotics on Cholera vibrios 197

Short Communications

L.V. KALAKOUTSKII and L.M. POZHARITSKAJA: Calorimetric studies on germinating and quiescent conidia of *Actinomyces streptomycini* B-6 209
Y.M. TSUSUĒ and T. YANAGITA: Induction of pleiomorphism by low temperature in the fruit-body formation in a Basidiomycetes 213

Number 3, September, 1968

Y. MAEDA, T. FUJITA, Y. SUGIURA and S. KOGA: Physical properties of water in spores of *Bacillus megaterium* 217
Y-T. LIU, H. TAKAHASHI and B. MARUO: Relaxed control of nucleic acid synthesis by a mutant of *Pseudomonas* 227
G. MUKERJI: Observation on the mutual relationships among soil microorganisms... 243
H. MURAKAMI, H. SAGAWA and S. TAKASE: Non-productivity of aflatoxin by Japanese industrial strains of the *Aspergillus*. III. Common characteristics of the aflatoxin-producing strains. 251
S. NAGASAKI: Cytological and physiological studies on phosphatases in developing cultures of *Aspergillus niger*..... 263
R. IRIE, N. YANO and H. KEMBO: Kinetic analysis of the UV-resistant transient stage in spore germination of *Bacillus subtilis* 279
L.A. DOROKHOVA, N.S. AGRE, L.V. KALAKOUTSKII and N.A. KRASSILNIKOV: Fine structure of spores in a thermophilic actinomycete, *Micromonospora vulgaris* ... 295
B. SAMANTA and S.K. MAJUMDAR: Chemical basis of streptomycin resistance in *Bacillus subtilis* 305
A. MANDAL and S.K. MAJUMDAR: Effect of streptomycin on the assimilation of amino acids by *Bacillus subtilis* 311

Short Communications

H.G. OSMAN and A.A. ABOU-ZEID: A technique for the isolation of actinomycetes from soils 317
G. TOMONAGA and T. YANAGITA: A new method for the continuous production of protease by *Aspergillus niger* 321
R.P. SETHI and N.S. SUBBA-RAO: Inhibitory of stimulatory effects of soil fungi on rhizobia 325
R.P. SETHI and N.S. SUBBA-RAO: Solubilization of tricalcium phosphate and calcium phytate by soil fungi 329

Number 4, December, 1968

T. FUJITA and S. KOGA: Turbidimetric determination of the germicidal action of cetyltrimethylammonium bromide on yeast cells 333
T. NAKASE and K. KOMAGATA: Taxonomical significance of base composition of yeast DNA 345
S. YASHIMA and K. KITAHARA: Oxidative decarboxylation of 6-phosphogluconate in *Leuconostoc mesenteroids* B07. I. Purification and properties of 6-phosphogluconate dehydrogenase 359

I. NIOH and C. FURUSAKA: Growth of bacteria in the heat-killed cell suspensions of the same bacteria 373
K. KIUCHI, H. KURAISHI, H. MUROOKA, K. AIDA and T. UEMURA: Floc formation in activated sludge. I. Floc-forming activities of representative bacteria isolated from activated sludge. 387
K. KIUCHI, H. KURAISHI, H. MUROOKA, K. AIDA and T. UEMURA: Floc formation in activated sludge. II. Identification of twelve representative strains isolated from activated sludge 399
R. AOKI, Y. KONDO, Y. HIROSE: and H. OKADA: Inosine fermentation—Production of inosine by mutants of *Bacillus subtilis*. IV. Scale-up of inosine fermentation ... 411
M. SATO and H. TAKAHASHI: Cold shock of Bacteria. I. General features of cold shock in *Escherichia coli* 417
Y. TAKAHASHI and S. HINO: Biochemical changes during the development of respiratory activity in *Escherichia coli*. II. Changes in enzyme activities 429
J.N. RAI, S.C. AGARWAL and J.P. TEWARI: *Cunninghamella brunnea* spec. nov.—A possible product of ecological specialization 443

Short Communications

P.G. BRISBANE and J.N. LADD: The utilization of methane, ethane and propane by soil micro-organisms 447
H. TAKAHASHI and Y. IKEDA: A simple method for obtaining multiple marked strains of *Bacillus subtilis* 451
